DETAILED ACTION

Allowable Subject Matter

1. Claims 1-3,5-14 and 16-23 are allowed.

The following is an examiner's statement of reasons for allowance:

Independent claims 1 and 12 have been amended to overcome the prior arts. The closest prior arts, Wilcox (US 6,920,315), Li (US 2003/0001784) and Trikha et al. (US 6,072,993) disclose a multi-mode mobile station and a method for operating a multi-mode mobile station comprising at least first and second antennas. However, the above prior arts of record, either singularly or in combination, fail to disclose or render obvious at least two modes of the multi-mode mobile station operate within at least one common range of frequencies, changing the resonance frequency of the second antenna of the mobile station so as to reduce coupling of the transmitted signal from the first antenna into the second antenna, as argued by applicants.

Claims 2-3 and 5-11 depend on claim 1. Therefore, they are allowed.

Claims 13-14 and 16-23 depend on claim 12. Therefore, they are allowed.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Auckland (US 2002/0183013 A1) teach programmable radio frequency sub-system with integrated antennas and filters and wireless communication device using same.

Brinsfield (US 2002/0095271 A1) teaches tri-mode medical telemetry antenna system.
